BRIEF ABSTRACT OF LETTER

Referring to the work of providing house Connections in the Mysore City for leading off the sullage from each house into pipe sewers, states that in the Course of the execution of the work it has been found necessary to give more than one Connection in the case of certain houses necessitating an alteration in the original scheme approved by Govt, and requests sanction thereto

NOTES AND ORDERS

T According to the general Sewerage Scheme approved by Govt in March 1912 and the provisions sanctioned since for new II & IV Drainage one Connection should be given to each

NOTES—First Sheet

ent of the Trunk Borrow Fund. In the Course of the execution of the work, however, it has been found necessary to provide additional Connections in the Case of certain houses so as to admit of all the outlage being drawn off

2 The original scheme of 1912 provided for 15,707 house Connections at Rs. 20/- a Connection. According to the requirements as now gauged, 20,000 Connections are required and the Chairman estimates that each Connection can be Constructed at an outlay of Rs 16/-. The works work to a total outlay of Rs 3,00,000/ against the original estimate of Rs 3,14,140/ The Chief Engineer is stated to have Considered it unnecessary to give Connections to 'Kutcha' houses, a further reduction in the total outlay is anticipated by adopting his suggestion The Chairman requests sanction to the Construction of all house Connections at Govt. Cost

000 trunk Connections
000 addl ones

3 The Chairman proposes the levy of a drainage cess on each house after the work is Completed, taking in Consideration interest on actual loss by determination of the Rs

Note—Contn sheet

of Maintenance, Repairs and renewals
rates Calculated on this basis works
as follows:

For a single Connection = Rs 0-7-4 per Annum

do 2 Connections = Rs 0-14-6 each do

do 3 do = Rs 1-0-10 do

Board of Trustees have resolved to
a cess of 8 annas for the 1st Connection
and one rupee for every additional Connection
Both, the Municipal Council have proposed the
rates -

1st Connection 12 annas

Every addl Connection = Rs 1-4-0 if
the work is done at the cost of the J. B.
or the Municipality

do = 12 annas where
it is done at owner's cost

This is however a matter to be
considered later on when definite proposals
are received from the Municipal Council

If approved, the file may be sent
to the Chief Engineer for O
of remarks, if any, on
Government's proposal to construct
house Connections out of the J. B.

If house connections are not provided for, the object of laying the underground sewerage will be defeated It is therefore very necessary that by some means or other the connections must be made

2 As to the question of ways and means, the Financial Department may be consulted

Deputy Chief Engineer of Mysore

Bangalore, 7th August 1915.

Note—Contn. sheet

GPS—25,000 -88-4 15

8. Both the Chairman of the Trust Board and the Chief Engineer consider the provision of house connections absolutely necessary if this City is to derive full benefit from the underground Sewerage system. The Chairman further considers that all the additional Connections can be given without exceeding the original estimate. In these circumstances, draft sanctioning the Construction of additional Connections from the T Bd. Funds is submitted.

9 The Chief Engr. says in his note (para 7 supra) that the Fl. Bd may be consulted as regards ways and means. No financial question seems to arise in this stage - hence, a reference to Fl. Bd is, it is submitted, unnecessary.

2 File resubmitted for orders.

The general sewerage scheme was approved by the San? Board and the action according to that scheme, only one house Connection should be given to each house. The present proposal is to give more Connections where necessary so as to draw off all the sullage the San? Bd may not, it is submitted, raise objection to this being done Besides, the proposal seems to involve purely administrative matters rather than Sanitary If it is directed that the C S Bd should be Consulted the same will be done

3 The Chairman also reports that the Chief Engineer has given as his opinion that Khutcha houses need not be provided with Sewer Connections and proposes to effect a red

Attention is invited to Rule 11 of the Rules regulating the submission of schemes to the Board (Page 5)

Chairman of the Board of Trustees,
Mysore City Improvements

To

D M Narasinga Rao, Esq , B A ,B L ,

Secretary to the Govt of H H the Maharaja
of Mysore, Gen and Rev Departments

SIR,

I have the honour to state that the Chief Engineer in his note on the drainage of the City of Mysore, in April 1910 and also in the memorandum accompanying his letter No 5657 dated the 26th June 1911 adaressed to the President, Central Sanitary Board, Bangalore, laid down that "not more than one connection should be given free of cost to each house " accordingly in the estimate for the General sewerage scheme approved by Government in their order No 6831-5/LL 136-11-7 dated the 21st March 1912 — 15,707 house connections were provided for at the rate of one connection per house Their estimated cost was Rs 3,14,140/- at Rs 20/- per connection In the projects subsequently sanctioned by the Government for Nos III. and IV Drainage Areas in their Nos. 2262-5/LL 75-12-8 and 12944-6/LL 50-13-47 dated the 11th September 1912 and 20th June 1914 respectively

SUBJECT

Collecting fees for sanction for opening all house connections in the mysore city approved and having case &c.

GEPM—600—24-11-18

respectively house connections are provided only at the rate of one connection to be given to each house at Government cost The works are also being executed accordingly

II. In the areas already drained, it is found that many houses have more than one outlet for carrying the sullage from each of them, but only one of these outlets is connected to the drainage system at Government cost Every endeavour was made to get the house owners pay for the remaining connections, but the endeavour was not successful Only a very few have come forward to pay for them. The pipe drains are laid and the house connections are only partly made and the result is that the streets and storm water drains are as before full of sewage water and the City is not benefitted by the extensive drainage works carried out at such enormous cost Under these circumstances it was considered that all the connections should be constructed at Government cost and the question with its different possible modes of execution was placed before the Board who in turn referred it to the Municipal Council The different methods proposed were

i Constructing the connections by Government at Government cost and recovering the same with interest as a loan in 4 easy instalments This involves extra establishment for the recovery of the money and requires repetition of it every 20 years or so wherever the connections require

complete

corplete renewal

ii Constructing the connections by Government at Government cost and recovering the amount with interest in 3 or 4 annual instalments This was considered a hardship

iii Constructing the connections by Government at Covernment cost and levying a cess called the "Sewage cess" which should not only cover the interest on the outlay of the work but also provide money sufficient for maintenance and renewal of the system when necessary

Of the three proposals the Municipal Council has approved the last, and will be asked to move the Government to sanction the levying of the Cess when the work is completed

III I now beg to request you to place the question before Government and obtain sanction for constructing all house connections for every house at Government cost From the enclosures it will be seen that the total number of house connections required for the whole City is 20,000 for which the total cost now estimated is ₹ ~~30,000/-~~ 3,00,000/- If also advise of the Chief Engineer, that house connections to Kutcha houses need not be given on the score that they use very little water and be adopted during execution a further saving can be effected in this amount In the General sewerage scheme above mentioned ₹ 3,14,140/- is provided Even if all the 20,000 house connections are built there will be no excess The proposal may therefore be sanctioned

The following

Encl to Lr dtd 5-12-56

Chairman's Note -

As detailed in Lr Larker's letter the total number of connections required is 20,000

Of which Trust Board will construct 12,000 The balance to be constructed by the owners of the houses will be 8,000 and these are proposed to be built by the Trust Board

Their cost at an average rate of Rs 15/- each, will be Rs 1,20,000/- There are three ways of getting this done

i Making the owners to build them at their own cost This appears to be not possible as the people have not either yet come to know its usefulness or too poor to pay in one lump the cost of the connections It is therefore accepted even in other places that this method is impracticable

ii The connections to be constructed at the cost of the the Trust Board and the value recovered from the owners in 120 easy monthly instalments This will be 2 annas per connection per month

iii The connections to be constructed by the Trust Board and instead of recovering the cost as in (ii) a permanent House Connection Cess levied, taking into consideration the interest on the initial expenditure loss by deterioration of the work and the cost of maintaining and repairing the system

The following may be taken as the rough calculations -

Interest on 1,20,000/- at 4%	4,800
Deterioration at 5%	6,000
Maintenance at Rs 7/- per mensem per 200 connections	8,400
Repairs . .	800
Total Rs	20,000

Average Re. 1/- per connection per annum

The usual charges for 20,000 connections amount as above to R$ 8,400 + 800 = R$ 9,200/-, which gives an average of R$ 0-7-4 per connection per annum

The special charges on account of 8,000 of these connections amount to R$ (4,800 + 6,000) = 10,800/-

This gives an av rage of Re 1-5-7 per connection, so that the Cess leviable in cases where only one connection is given 0 7-4, in Cases where two connections are given will be Re $\frac{(1\text{-}5\text{-}7 + 0\text{-}7\text{-}4)}{2}$ = Re 0-14-6 each, and in cases where three connections are given, the average cost of each such connections will be Re 1-0-10 each

In Baroda the cess is Re 1/-, per annum for the 1st connection and annas 8/- for every additional connection

In either case of 1 or 2 a cess of about 8 annas per connection per annum will have to be levied for maintenance and repairs

Letter No 168 dated the 8th June 1915 from the Chairman, Mysore City Impt. Trust Board, stating with reference to

~~ORDER THEREON.~~ No

the work of providing house Connections in the Mysore City to lead off the sullage from each house into the pipe sewers, that according to the general scheme

SUBJECT

Scheme sanctioned by Govt in March 1912 and the prospects were afforded for Nos. II and IV Drainage areas only one Connection should be given to each house out of the Trust Board Fund but until in the course of the actual execution of the work it has been found necessary to give more than one Connection in Several Cases so as to admit of all the sewage being drawn off, and requesting in the circumstances sanction to the Construction of all house Connections according to present requirements at Govt Cost, pending the submission of separate proposals by the Munb. Council for levying a drainage cess on each house Connection after the work is Completed

---

Order no 2223 Mnl 5-1-14-74 914 915

It is stated that

according

G R S 27]

GENERAL AND REVENUE SECRETARIAT

(*Continuation sheet draft form*)

according to the original scheme of 1912 15707 house Connections at Rs 20/- a Connection should be provided at the Cost of the Irrigation Board fund at the scale of one Connection to each house and until the actual requirements as now gauged are for 20000 which can be constructed at an outlay of Rs 15/- a Connection. A further reduction in the total outlay is anticipated by eliminating provision for house Connections to Kutcha houses, as suggested by the Chief Engineer Therefore the Chairman, Considers that all the house Connections according to present requirements can be Constructed from the I Bd fund without exceeding the original estimate of Rs 3,14,140/-. The Chief Engineer also Considers the

of house Connections are not
provided for, the object of
laying the underground
sewerage system with the
defendt. In these circumstances
Govt are pleased to sanction
the Construction of additional
Connections, where necessary,
at the Cost of the Bombay, out of the annual grant at its disposal
The above suggestion about the elimination of house Connections in Cutcha houses is
2) The President of the Munic
Council is requested to submit
definite proposals of the
Munic. Council in the matter
of the levy of the drainage cess
in Consultation with the
Board of Trustees for the City
Improvements, so that it
may be introduced, if expedient,
in each drainage area separately
as soon as the work is Com-
pleted
